TESTING. OWNERSHIP. INTEGRITY.

ISTA Testing

ISO/IEC 17025 Accredited Testing Laboratories

The International Safe Transit Association (ISTA) is a non-profit organization dedicated to helping companies optimize their packaging and transportation operations through a wide range of test procedures and guidelines.

ISTA creates standards for packaging design to ensure packaging can withstand shipping conditions based on the package's size, weight, and potential transportation hazards like temperature, vibrations, drops, horizontal impacts, and compression.

As ISTA certified WESTPAK's labs are authorized to conduct ISTA tests and certify that packaging materials meet the association's standards. Our laboratories are equipped with state-of-the-art equipment and testing procedures to simulate the various conditions that packaged products may encounter during transportation, including temperature, vibration, compression, and drops.

ISO 17025 accreditation is a globally recognized standard for testing and calibration laboratories, demonstrating our competence and reliability in producing accurate results, thereby enhancing your confidence and facilitating wider acceptance of WESTPAK test reports across international borders.

ISTA Testing

Transport Simulation Performance Testing

Non-simulation Integrity Performance Testing

ISTA 1A, 1B, 1C, 1D, 1E, 1F, 1G, 1H

Partial Simulation Performance Testing

ISTA 2A, 2B, 2C

General Simulation Performance Testing

ISTA 3A, 3B, 3E, 3F, 3H, 3K, 3L

Sam's Club Packaged Products

ISTA 6 SAM'S CLUB

FedEx Packaged Products

6-FEDEX-B

Amazon Packaged Products

ISTA 6-AMAZON.COM-Over Boxing, ISTA 6-AMAZON.COM-Ships in Own Container Container (SIOC)

Cold Chain Temperature Testing ISTA 7D

Thermal Transport Packaging ISTA 7E

Speed to Market With Quality You Can Trust

WESTPAK is always up-to-date on the latest regulatory updates and changes. In fact, members of our team have the honor of serving on ISTA and ASTM committees. WESTPAK actively participates in shaping many facets of the industry.

WESTPAK's 25 years of partnership with ISTA ensures that WESTPAK is on the cutting edge of industry changes, evolving standards, and knowledge of package certification and validation.

WESTPAK engineers serve on ISTA committees and Nora Crivello, WESTPAK President and CEO, has served on the ISTA board for many years and currently holds the role of ISTA Chairperson.
